Measured — Moodboard

12 references from the GoTall research, plus three of our screens

REFERENCES: WHAT WE BORROWED

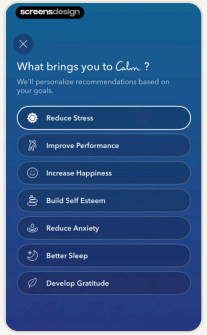

Taller
Promise hero: one-line "Predict your height" pitch

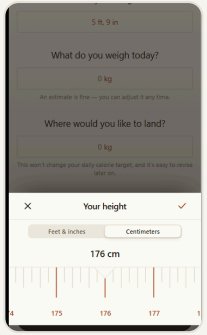

Taller
Long-term results curve; we show a range instead

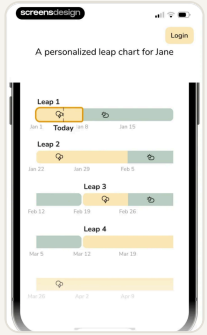

Taller
Big-number trust stat, here with a stated method

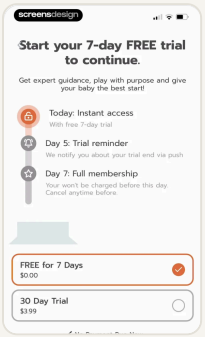

Calm
Goal picker: one decision per screen

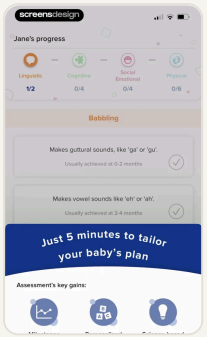

Height picker sheet
Cream sheet, tick ruler, cm / ft-in toggle

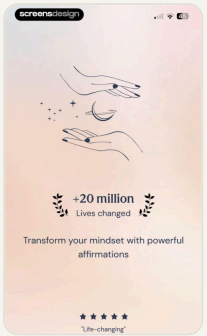

Wonder Weeks
Personalised chart built from your own inputs

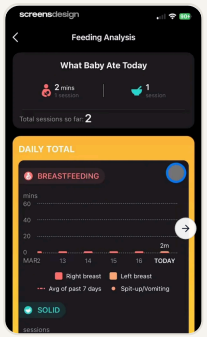

Kinedu
Trial timeline with dates and cancel note

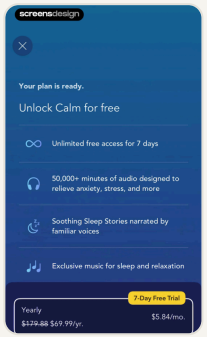

Kinedu
Progress cards, short "tailor your plan" prompt

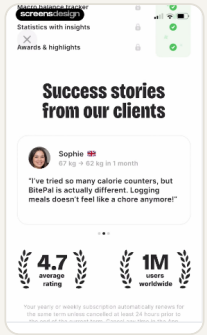

I Am
Typographic hero with a single CTA

Glow
Calm data cards, one accent colour

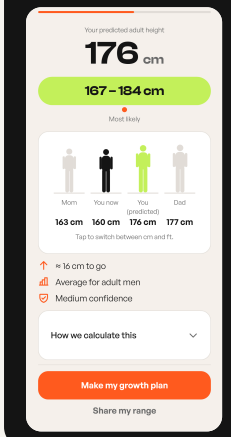

Calm paywall
Benefit list above the plan choice

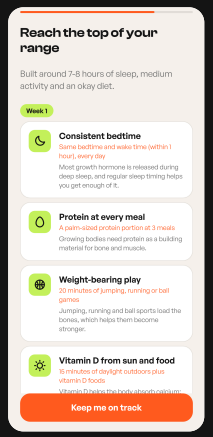

Calm paywall
Social proof panel, kept honest

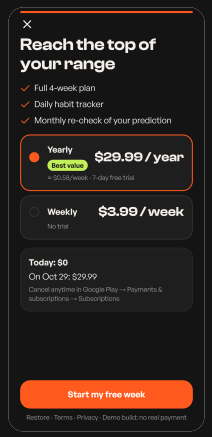

RESULT: MEASURED, REFERENCES APPLIED

Reveal
Range pill and figure row; Taller's big-number result, but free, with the method behind "How we calculate this".

Plan
Weekly milestones (Kinedu) and calm data cards with one accent colour (Glow).

Paywall
Dated trial timeline (Kinedu, Calm), with the full billed price as the biggest text.

Direction: Bold Measure

big numbers, ruler ticks

Paper	Ink	Tangerine	Lime
#F6F4EF	#141414	#FF5A1F	#C6F25B

178 cm

Clash Display
Headings and big numbers. Body in General Sans, both from Fontshare.

Huge tabular numerals for the predicted height, ruler ticks as a brand motif, one dark surface for contrast. Chosen over "Clinic Warm" because it out-designs Taller's purple-on-black and reads sporty, not clinical.

TOOL STACK

JOB	TOOL	WHY
Screen design	**Figma**	Auto layout, shared tokens, free Starter plan.
Type	**Fontshare: Clash Display + General Sans**	Free for commercial use, distinctive and readable.
Icons	**Phosphor**	MIT licence, one consistent stroke weight.
Illustration	**Code-drawn SVG ruler and silhouettes**	One consistent style, and the visuals stay live UI, not stock images.
Motion	**Reanimated + gesture-handler**	Native-thread animation for the ruler and count-up.
Haptics	**expo-haptics**	Tactile ticks while dragging the height ruler.
App framework	**Expo + React Native + TypeScript**	One codebase, typed, fast iteration.
Device testing	**Expo Go**	Test on a real phone with no build step.
Screenshots, style sheet	**Playwright pipeline**	Repeatable exports straight from the design tokens.
Build and QA	**Claude Code agents**	Fast build, plus automated review and QA passes.
