GoTall vs Measured

An annotated teardown of GoTall's onboarding, and what we did differently.

COMPETITOR

GoTall - Height Predictor by Grow Labs LLC

MRR $57.8k, 17.6k subs - TrustMRR (Superwall-verified), fetched 22 Oct 2026

https://apps.apple.com/us/app/id6747467975

TAPS TO PAYWALL

GoTall	Measured
~50 (estimated from stills)	**-**

SECONDS TO PAYWALL

GoTall	Measured
measure pending	**-**

GoTall reported flow: 31 steps (ScreensDesign chapter list (secondary); our count from the stills is 33 distinct screens incl. splash, tracking prompt and rating prompt). Measured – Flow: promise, goal, about, height, parents, building, reveal (7 screens, 4 questions) then habits, plan, priming, paywall. Free result before the paywall. Taps counted on the built app with default picker values; seconds to be timed in the demo.

VERDICT

GoTall shows 33 screens of questions, claims, a tracking prompt and an App Store rating request before anything is revealed, then locks the result behind a 'special offer' paywall. Measured shows an honest range after 4 questions, free.

FLOW STRIP 1/2

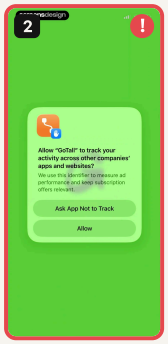

Every screen, in order

44 screens captured. Red badge = friction point (16 marked). Tags show screen type.

PROMISE AND PERSONALISATION

What screen 1 promises, and what matters

SCREEN 1 PROMISE

Predict your height - Input your details to discover your future height and potential

BENEFIT OR FEATURE?

Feature

The same headline sits on a six-slide carousel of app features (dashboard, meal scanner, exercises, sleep, AI coach). It describes what you do in the app, not the outcome you get, and gives no idea of how long the quiz is.

MEASURED'S PROMISE

Your honest adult height, in 60 seconds. 4 questions, no account, result before any paywall.

Promise states the cost up front: '4 questions - about 60 seconds'. All 4 answers change a later screen (unit, silhouettes, range width, plan order). See slice spec section 3.

Questions asked vs questions that change later screens

QUESTION (GOTALL)	USED LATER?	NOTE
Teen or parent	**Changes a later screen**	Copy switches to 'your child' (screens 10+)
Birth date, gender, height, parents' heights	**to verify**	Feed the prediction, but the result is locked, so the user never sees the effect before paying
Weight, shoe size	**Collected, never used**	Nothing visible uses them in onboarding
Who brought you here?	**Collected, never used**	Influencer attribution for marketing
Sports, exercise hours, sleep hours	**to verify**	Presumably feed the plan, which is behind the paywall
Relatives taller than dad, race	**to verify**	Claimed to improve accuracy; no visible effect
Goal height	**to verify**	'Dream odds' is locked on the teaser

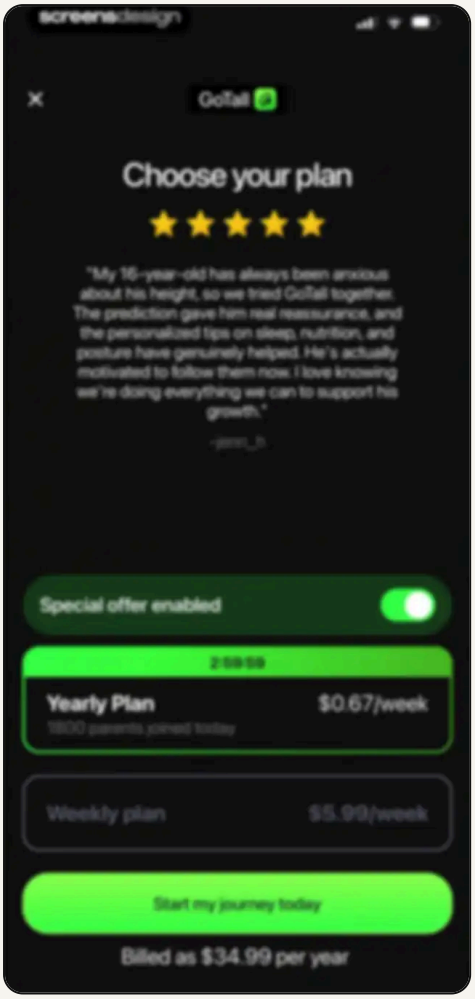

Measured: every answer changes something

ANSWER	WHAT CHANGES
Goal	Wording on reveal, plan and paywall headlines
Sex, age	Growth curve, confidence note, building lines
Height, unit	"X cm to go", silhouette, units everywhere
Parents / "I don't know"	Silhouette row, range width (+/-8.5 to +/-10.5 cm) and a note
Sleep, activity, diet	Which habits appear in the plan, and their order

Source: design/measured-slice-spec.md section 3. GoTall rows marked "to verify" need a screenshot check.

PAYWALL TEARDOWN

Where the result gets held back

Position	After 33 screens, before the result is revealed (screens 41-43 lead to a locked teaser) ScreensDesign stills 41-44
Plans shown	Yearly $0.67/week (pre-selected) and Weekly $5.99/week ScreensDesign still 44
Full price	'Billed as $34.99 per year' in small text under the button ScreensDesign still 44
Trial	Later variant: 'Start your FREE 3-Day trial', billing reminder on day 2 SECONDARY ScreensDesign later paywall (paywall-flow/pw61)
Urgency	'Special offer enabled' toggle with a 2:59:59 countdown chip ScreensDesign still 44
Social proof	5 stars + long parent testimonial; '1800 parents joined today' ScreensDesign still 44
Close button	X at top left, visible ScreensDesign still 44 (delay not measurable from a still)
Discount on dismiss	A later 'discount' offer reported SECONDARY Review (us, 1 star)
Fear copy	'Don't let it go to waste' (screen 17); 'costs of being short' reported SECONDARY Still 17; review paraphrase (gb, 1 star)

Dark patterns

- Result withheld until payment: 'Reveal My Results' leads to a locked teaser
- Fake urgency: 'Special offer' toggle with a 2:59:59 countdown
- Price anchoring: $0.67/week large, $34.99/year in small print
- Store rating requested mid-onboarding, before any value
- Unsupported claims: '98.7% accuracy', 'up to 20% of height from habits', testimonials with cm gains

HOW MEASURED ANSWERS IT

Measured paywall: visible X, full price largest ($29.99 / year), trial end date and 'Today: $0', in-app cancel path, no countdown, and the result is already free.

REVIEWS TO DESIGN OPPORTUNITIES

What users complain about, and our answer

150 reviews fetched via Apple RSS (us/gb/ca/au), 119 are 1-3 star. Keyword tallies overlap, approximate. Fetched 22 Oct 2026. Secondary source.

THEME	COUNT	QUOTE	HOW MEASURED ANSWERS IT
Result locked behind paywall after long quiz	95	*"I did the whole questionnaire and wanted to get my results but at the last second told me I had to pay (ca, 1 star)"*	Free result after 4 questions; the paywall only gates the plan.
Time wasted on long personal questionnaire	43	*"Tell me up front so that I don't waste my time. (us, 1 star)"*	'4 questions - about 60 seconds' on screen 1, a progress bar, the rest optional after the result.
Billing surprises	19	*"It said $0.67 per week but it really charged me $35. (us, 1 star)"*	Full billed amount first, trial end date, 2-day reminder, cancel path shown.
Distrust of accuracy	13	*"I typed in a dream height of 185cm and the app says that the probability is very low. However the coach is predicting a height of 186cm. (au, 2 star)"*	One model, a range with stated error (+/-8.5 cm), method explained on the reveal.
Privacy / sensitive inputs	9	*"Not fair how it asks me how tall my dad is when I've never met the guy (gb, 1 star)"*	'I don't know' for each parent, the range widens and says so; no photo, no account.
Feature bugs and gaps	5	*"What happened to the sleep score? It stopped going after week 13 (us, 3 star)"*	Small scope: a plan checklist that works; no referral or scoring promises.

Counts are keyword tallies over 119 low-star reviews and overlap; quotes are verbatim from the Apple RSS feed. Source: research/gotall-research.md.
