Honest height, before any paywall.

The height predictor that beats GoTall's onboarding.

ONE-LINE TEST

For 13–17-year-olds who want to know how tall they'll get but hate 30-question quizzes that end in a paywall, Measured shows your honest height range in under a minute, unlike GoTall, because you see your result before any paywall and the price is never hidden.

WHO

Teenagers aged 13–17 who are curious how tall they will get. Secondary user: parents checking for their child.

PAIN

★ "I did the whole questionnaire and wanted to get my results but at the last second told me I had to pay" — GoTall App Store review, 1 star (CA)

★ "It said $0.67 per week but it really charged me $35." — GoTall App Store review, 1 star (US)

PROMISE

Your honest adult height range in 60 seconds

PROOF

The result appears inside onboarding, free, before the paywall. The method is stated (Tanner mid-parental height + CDC data) and the answer is a range, not a single magic number.

DIFFERENTIATOR

4 questions instead of 31. Nothing is locked. The full billed price, trial end date and cancel path are shown on the paywall. No fake countdown.

	GOTALL	MEASURED
STEPS TO RESULT	~~31 steps~~	**4 questions**
RESULT	~~Locked~~	**Free**
PRICE FRAMING	~~"$0.67/week"~~	**Full billed price**
URGENCY	~~Fake 3-min timer~~	**None**
